

- Simple and complex bespoke product solutions
- Controlled in-house design and off site manufacturing
- Designed specifically to your precise specification
- Flexible quantities
- Different type of plastics, finishes and colours available
- Saves time and money on site
- All products ensure an airtight fit to other Domus components

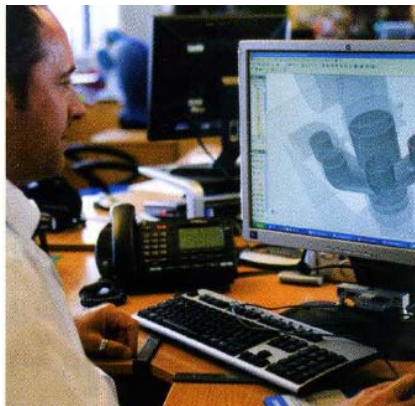

Bespoke Manufacturing & Design Service

Specialists in quality product solutions

This unique and bespoke part of our business is important to support our customer's needs. Polypipe Ventilation's team of highly qualified, experienced designers are on hand to provide a bespoke design and fabrication service when required to help solve a particular issue.

Although we offer the most comprehensive range of plastic ventilation ducting products on the market there are always those occasions when a bespoke product is needed to meet the requirements of a particularly complex design or installation.

We can offer **Standard Specials** - Modifying existing product or **Custom Specials** - New and unique designs.

Benefits

- Reduced labour cost
- Speed of installation
- The right product for the job
- Health and safety
- Reduced waste
- Guaranteed system compatibility

Information Sheet

This service is extremely useful for contractors, specifiers and end-users as it allows design and installation problems to be overcome, both at the design stage and on site, without the cost, time and inconvenience of work-rounds.

We can supply bespoke products in quantities significantly lower than traditional manufacturing batches to meet the needs of the project.

Working together with technical support and design, our fabrications team ensure that we can respond efficiently to customers needs to design and provide solutions to all their ventilation problems.

Three easy steps for our special fabrication service ...

REQUEST FOR QUOTATION

It couldn't be easier to order/obtain quotation for a special or custom product. Just follow three simple steps and we will see if we can help you:

1. Complete the fax back the form below and, if possible, attach a dimensioned sketch and specification.
2. We will then advise you on design possibilities and feasibility and send you back a CAD diagram, if necessary, complete with lead time, part number and price for your approval.
3. You can place an order through your local merchant/supplier, stating the unique product number and price.
